OTTAWA, ONTARIO  
CANADA K2C 3H4

## INSTRUCTIONS

MODEL AV-141F

×10 GAIN, ±5V OUTPUT

PULSE AMPLIFIER

WITH 4 ns RISE AND FALL TIMES

SERIAL NUMBER: \_\_\_\_\_

### WARRANTY

Avtech Electrosystems Ltd. warrants products of its manufacture to be free from defects in material and workmanship under conditions of normal use. If, within one year after delivery to the original owner, and after prepaid return by the original owner, this Avtech product is found to be defective, Avtech shall at its option repair or replace said defective item. This warranty does not apply to units which have been disassembled, modified or subjected to conditions exceeding the applicable specifications or ratings. This warranty is the extent of the obligation assumed by Avtech with respect to this product and no other warranty or guarantee is either expressed or implied.

## INTRODUCTION

The Model AV-141F is a DC-powered +20 dB ( $\times 10$ ) pulse amplifier module. The input and output can operate to  $\pm 5\text{V}$ . The input impedance is  $50\Omega$ , and the output can drive loads as low as  $50\Omega$ .

## SPECIFICATIONS

Model:	AV-141F
Bandwidth:	DC - 75 MHz
Gain:                    in dB:	20 dB
voltage gain (V/V):	$\times 10$
Rise/fall time <sup>1</sup> :	4 ns
Input impedance:	$50\Omega$
Peak output: (to $50\Omega$ )	$\pm 5\text{V}$
Output impedance:	$50\Omega$
Min. input pulse width:	10 ns
Max. input pulse width:	No limit.
Equivalent input noise:	$4\text{ nV} / \sqrt{\text{Hz}}$
Connectors:	SMA
Prime power:	$\pm 24\text{V}$ , 200 mA
Dimensions:	1.7 x 2.6 x 4.3"

1) Measured for a pulse from 0V to maximum positive voltage output, between the 20% and 80% amplitude points.

## REGULATORY NOTES

### FCC PART 18

This device complies with part 18 of the FCC rules for non-consumer industrial, scientific and medical (ISM) equipment.

This instrument is enclosed in a rugged metal chassis and uses a filtered power entry module. The main output signal is provided on a shielded connector that is intended to be used with shielded coaxial cabling and a shielded load. Under these conditions, the interference potential of this instrument is low.

If interference is observed, check that appropriate well-shielded cabling is used on the output connectors. Contact Avtech ([info@avtechpulse.com](mailto:info@avtechpulse.com)) for advice if you are unsure of the most appropriate cabling. Also, check that your load is adequately shielded. It may be necessary to enclose the load in a metal enclosure.

If any of the connectors on the instrument are unused, they should be covered with shielded metal "dust caps" to reduce the interference potential.

This instrument does not normally require regular maintenance to minimize interference potential. However, if loose hardware or connectors are noted, they should be tightened. Contact Avtech ([info@avtechpulse.com](mailto:info@avtechpulse.com)) if you require assistance.

### EC DECLARATION OF CONFORMITY

We                    Avtech Electrosystems Ltd.  
                          P.O. Box 5120, LCD Merivale  
                          Ottawa, Ontario  
                          Canada K2C 3H4

declare that this pulse generator meets the intent of Directive 89/336/EEC for Electromagnetic Compatibility. Compliance pertains to the following specifications as listed in the official Journal of the European Communities:

EN 50081-1 Emission

EN 50082-1 Immunity

and that this pulse generator meets the intent of the Low Voltage Directive 72/23/EEC as amended by 93/68/EEC. Compliance pertains to the following specifications as listed in the official Journal of the European Communities:

EN 61010-1:2001 Safety requirements for electrical equipment for measurement, control, and laboratory use

#### DIRECTIVE 2002/95/EC (RoHS)

This instrument is exempt from Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003 on the Restriction of the use of certain Hazardous Substances (RoHS) in electrical and electronic equipment. Specifically, Avtech instruments are considered "Monitoring and control instruments" (Category 9) as defined in Annex 1A of Directive 2002/96/EC. The Directive 2002/95/EC only applies to Directive 2002/96/EC categories 1-7 and 10, as stated in the "Article 2 - Scope" section of Directive 2002/95/EC.

#### DIRECTIVE 2002/96/EC (WEEE)

European customers who have purchased this equipment directly from Avtech will have completed a "WEEE Responsibility Agreement" form, accepting responsibility for WEEE compliance (as mandated in Directive 2002/96/EC of the European Union and local laws) on behalf of the customer, as provided for under Article 9 of Directive 2002/96/EC.

Customers who have purchased Avtech equipment through local representatives should consult with the representative to determine who has responsibility for WEEE compliance. Normally, such responsibilities will lie with the representative, unless other arrangements (under Article 9) have been made.

Requirements for WEEE compliance may include registration of products with local governments, reporting of recycling activities to local governments, and financing of recycling activities.

## CONTROLS

The input and output SMA connectors are located on the front end of the module, as shown above. The +24V, -24V, and GND input solder terminals are located on the opposite end.

## POWER SUPPLIES

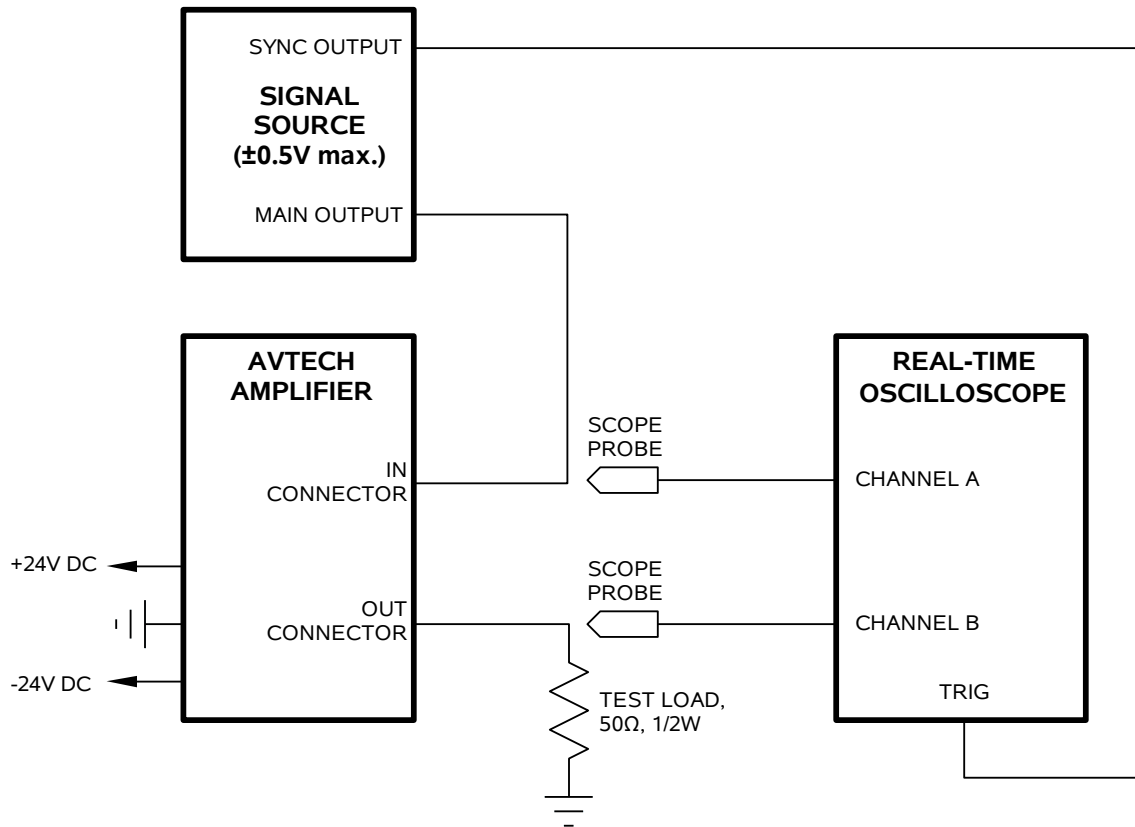

The AV-141F must be supplied with DC power supplies of nominally +24V and -24V (as well as a ground connection). In practice, the supplies may be as low as  $\pm 18V$ . The DC power supplies are internally regulated.

The power supply inputs are protected from excessive voltages and incorrect polarities by externally-mounted (and replaceable) 1N4750A Zener diodes. These diodes may be damaged by reversed polarities, or voltages exceeding  $\pm 27V$ .

## PROTECTING YOUR INSTRUMENT

The input and output circuits do contain some over-voltage protection circuitry. However, failures due to the application of excessive input voltages ( $> \pm 0.5V$ ) are not covered by warranty.

## BASIC TEST ARRANGEMENT

The recommended test set-up is shown above. The Avtech AV-1030-C pulse generator is a suitable signal source.

The bandwidth capability of components and instruments used to display the pulse generator output signal (attenuators, cables, connectors, etc.) should exceed 300 MHz.

PERFORMANCE CHECK SHEET
